***Welcome to Meta Web Inu (META WEB), a community-driven, equitably launched, decentralized (metaverse, NFT & meme coin) on Binance Smart Chain where we can create/buy or sold memes NFT. These memes character can be auctioned & seen in metaverse world when we dives into it. Later on, the total number of 100K cabbed plots will be created & can be bough with (META WEB) coins. It aims to be the world's Largest NFT metaverse coin. Meta Web Inu(META WEB) was largely inspired by the meme coin Shiba Inu & NFT coin Decentraland(MANA), from that we started a project on it and it may kill both Shiba Inu and Decentraland(MANA) in 2022.***

# Our project will mainly focus on

1. Providing platform for creating memes and sold it as NFT
2. Creating metaverse world where the memes avatars can be seen .
3. Creating plots for these avatars to live in like real world .
4. When all these land finally bought then it can be traded as real estate.

We all know that a **non-fungible token (NFT)** is a non-interchangeable unit of data stored on a blockchain, a form of digital ledger, that can be sold and traded.

So we are going to create a Platform where we can buy, create and sold nft.

The highest ever paid for NFT  
Is the “The First 5000 Days”  
sold for **USD 69.3 million**

**When humans controlled avatars in a virtual reality world it can be told as Metaverse. So for that world virtual land is also needed , therefore we will create a total number of 100K cabbed plots which can be bought with the coin (META WEB). When all these plots will be sold completely then the holders can also trade with it like real estate and can sold according to their desired amount and price.**
